

## CORK RUBBER MOUNTING PADS

### CRMP Series

VibraSystem Inc. CRMP Cork Rubber Mounting Pad is designed to solve problems caused by structure born vibration and noise. Constructed of cork with opposed ribbed pads on either sides for added isolation and positive grip.

### Recommended for:

The CRMP Pad is suitable for applications where bolting is to be avoided and minor non-critical vibration conditions exist. It is also recommended for indoors applications such as compressors, blowers, AC units chillers, pumps, etc.

| Model     | Load Range per square inch (psi) | Dimensions in inches |            |                |
|-----------|----------------------------------|----------------------|------------|----------------|
|           |                                  | Length (in)          | Width (in) | Thickness (in) |
| CRMP-0202 | 15 - 75                          | 2                    | 2          | 7/8            |
| CRMP-0303 | 15 - 75                          | 3                    | 3          | 7/8            |
| CRMP-0404 | 15 - 75                          | 4                    | 4          | 7/8            |
| CRMP-0606 | 15 - 75                          | 6                    | 6          | 7/8            |
| CRMP-0808 | 15 - 75                          | 8                    | 8          | 7/8            |
| CRMP-1212 | 15 - 75                          | 12                   | 12         | 7/8            |
| CRMP-1818 | 15 - 75                          | 18                   | 18         | 7/8            |

### Typical Installation:

### Features:

- ✓ Excellent product for acoustic problems applications.
- ✓ Anti-skid surfaces through ribbed construction.
- ✓ Simple field installation / No bolting required.
- ✓ Working Range: 15 to 75 psi.
- ✓ Material: Special Rubber with low density cork.
