Wedge Mounts VWH-Series

VWH designed for precise leveling of heavy industrial machinery, equipment and various structures. Accurate leveling is achieved by three precision ground wedges. Wedges are guided and provide stable, accurate leveling under heavy load. Three machined wedges are held together by a horizontal adjusting bolt. A lock screw secures the mount in the leveled position. Keys in the sliding surfaces of the wedges ensure rigid mount construction. A special opening allows for bolting of the machine to the floor.

Features:

- ✓ Precision leveling.
- ✓ Leveling range $\pm 0.150"$.
- ✓ Optional neoprene top and bottom pads.
